

Flakefleet Primary School Continues Their 1:1 iPad For Learning Journey With JTRS & Our Flexible Subscription Solution; BOS

Flakefleet Primary School based in Fleetwood, Lancashire, worked closely with JTRS to deploy a 1:1 iPad solution for teachers and pupils using BOS; our flexible subscription solution for education.

THE CHALLENGE

Flakefleet Primary School have utilised iPad as a learning tool for the last 5 years. The effective use of iPad has enhanced learning in the school but ever growing budget pressures had meant that continued capital investment in iPad had become unsustainable. As a consequence, teachers and pupils were using a range of iPad models with varied versions of iOS installed. Older devices were unable to support the most innovative new Apple education tools, such as Apple Classroom.

THE SOLUTION

Flakefleet wanted to refresh their devices using a more sustainable financing solution. They worked closely with JTRS to implement a bespoke BOS subscription solution, consisting of the latest 9.7" iPad, protective cases, next day swap warranty, technical set-up, ongoing Apple Professional Learning, and a variety of flexible boost options.

THE RESULT

Flakefleet transitioned some of their legacy devices to the lower school years and refreshed their entire estate of Key Stage 2 devices. Though the BOS subscription solution, Flakefleet teachers and pupils will always have access to the latest technologies and to expert support. Subscription not only enables sustainability in terms of finance, it also enables sustainability in classroom innovation.

WE DID IT!

FAST ROLL-OUT

A paperless process using electronic signature, with deployment in one go just a few days after contracts were e-signed

IMPACT

1

Bespoke BOS Solution Deployed

IN THEIR OWN WORDS...

We have always been a school that strives to continuously innovate our practice to ensure we are providing the best educational experiences for our pupils. Technology plays a vital role in our vision for teaching and learning and the BOS subscription allows us to continue our innovative work with the support of the latest technologies and ongoing support from a recognised expert and partner; JTRS.
